RAPESEED AND MUSTARD

Publish under
**National Initiative of Climate Resilient
Agriculture (TDC)**
2016-2017

Rapeseed leh Mustard chu hun rei lote chhunga puitling leh seng nghal theih chi thlai a ni a. Oil siam chhuahnan an tangkai hle bawk a. Sorson, toria leh taraminna te hi rapeseed tih an ni bika, Antam chi uk, rail eh ranga hi mustard tih a ni vet hung. Rapeseed leh mustard hian an oil (tel) pai zat hi 30 – 48 % zel a ni a. Hmun lum lampang a chin a ni tlangpuia, khawvawt lutuk leh thli tam lutuk an dawl loh a vangin. NEH region ah phei chuan oil tharchhuah nan heng thlaite hian hmun pawimawh tak an chang a, hlawhtling tak a lo tharchhuah tawh a ni bawk.

Tam tak leh hlawk tham tak a thar chhuak tur chuan ahun tak akan ching leh enkawl a ngaia. A hun tak a kan chin loh vang te leh an mamawh ang lei tha kan pek loh vang te leh an tui mamawh leh rannung lak a kan veng that loh vang te hian kan thlai in a tuar in a chhiat phah a, chuvang chuan enkawl dan tur dik kan hriat a chutiang tak a kan enkawl chu a pawimawh hle dawn a ni.

Heng a hnuai a kan tar lan tur te hi Rapeseed leh Mustard NEH region a kan enkawl dan tur a mithiam te minrawn a ni.

Soil:

Rapeseed leh Mustard chin nan chuan hmun hnawm leh tlem a huh tui pai lam lei ah an

to tha duh bik a. Hmun tlem a awi deuh, terraces leh hmun zawl hnawng leh tui luan chhuah thatna hmun tha tak kha tha deuh leh rual khai tak a an to nan khan a pawimawh hle a, vawihnih, vawithum lei kan leh nawn te kha mustard leh rapeseed chin nan chuan a ngai thin a ni.

Sowing:

Rapeseed leh mustard hi September thla tawp lam a tanga October thal lai hawl vel inkar a chin thin tlangpui a ni a. A hun tak a chin hian an chaw mamawh ang an dawng tha a. A hun a kan chin loh chuan a chi tur lo in siam hun ah khan tur tlak chakna khan arawn nang ching thin a ni, chin hun ai tlai a kan chin in.

Nutrient:

NE States ah chuan hmun zawl ah leh tlem a awi deuh ah chuan lei tha hi 1 hacre 50:60:30: kg NPK an mamawh a. Azotobacter leh nitrogen kan pek khan a chi thar chhuah zat kha a ti pung bawk a. Chu ai ah chuan leitha hman tur a a sawi zat atanga NPK 50 % leh 2.5

t/ha /fYM hman nan khan a that dan a in ang reng a ni.

Water Management:

A nihna tak ah chuan tui han pek hranpa a ngai leh toh chuang a, lei hnawng tha tak a kan chin chuan October leh November chhung a vawihnih/vawikhat kan pek kha a tawk mai a. Amaherawh chu tui an lo tlachham a an mamawhna a lo san leh si chuan, a kuhmum hunlai khan vawikhat pek tur a ni a thar chhuah a lo tam nan. Tui a mamawh zat tak kan pek hian kan thar chhuah a ti tam vet hung a ni.

Weed Management:

Hnim lo to a awm hian thlai thar chhuah zat tur kha nasa tak in a ti hniam thin a. Euphobia hirta, chenopodium album te hi mustard leh rapeseed china field a hnim to tlanglawn tak a ni. Heng
